OBJECTIVE

Securing a full-time or a long-term contract Logistics and Planning Manager position with a leading company, where I could utilize my strong analytical, logistics, planning and managerial skills, and also fully realize my educational background and expertise.

QUALIFICATIONS HIGHLIGHTS

- Over five years of experience in the management of logistics departments.
- More than ten years of experience in analysis, planning, development and processes optimization.
- Proven organization and multitasking skills; effective leader and problem solver.
- Proven ability to build logistics system that cuts costs and increases profits of a company.
- Relevant post-graduate educations and certificates.
- Advanced in computer software applications (MS Office and analogs; analytical; planning).
- Professional Membership of the American Production and Inventory Control Society (APICS).

RELEVANT SKILLS AND BUSINESS DUTIES

Logistic Management:

- Management of purchase, planning, replenishment and distribution departments: planning, guidance and control.
- Management of supply chain and just-in-time delivery processes: planning, coordination and control.
- Management of warehousing processes and the 3rd Part Logistic: coordination and control.
- Supervision of inventory stocks and turnovers, demand planning: planning, guidance and control.
- Statistical sales forecasting and planning of Store Keep Units.
- Physical inventory of stocks 'from wall to wall'.
- Development of business networking with other departments.
- Staff training and tutoring in logistics processes.

Analysis and Planning Management:

- Gathering, verification, combining and analysis of data from inner and outer sources.
- Qualitative modeling, quantitative simulation and optimization of processes.
- Trend-&-season statistical analysis, ABC-XYZ analysis and forecasting.
- Supervision of financial planning and budgeting.
- Cash flow analysis, return on investment analysis, risks analysis and costs cuts.
- Pricing development, leading and optimization.
- Leading and participation in business development and optimization projects.
- Strategic/SWOT analysis; short-term and long-term plans development.
- Key Performance Indices development.
- Reports and preparation of recommendations to the company management and owners.
- Development, implementation and maintain a planning-&-logistics system: analysis and mathematical modeling, mathematical calculation core, user interface, database support, manuals.
